

I am against this proposal because of the interference, noise pollution, and ruination of the HF radio spectrum, a resource that the FCC is mandated to protect; not sell to the highest bidder. The FCC should be ashamed for letting the idea get this far. There are other viable means of providing broadband to homes and businesses, everywhere. The entire proposal is a sad indicator of how low this country has sunk. Stand tall FCC. Get a spine and preserve the natural resource that we have.
